

Assembly Instructions for: Kitchen Units - Corner Counters

Warning: Choking Hazard
Assembly hardware contains
small parts. **Adult assembly required.**

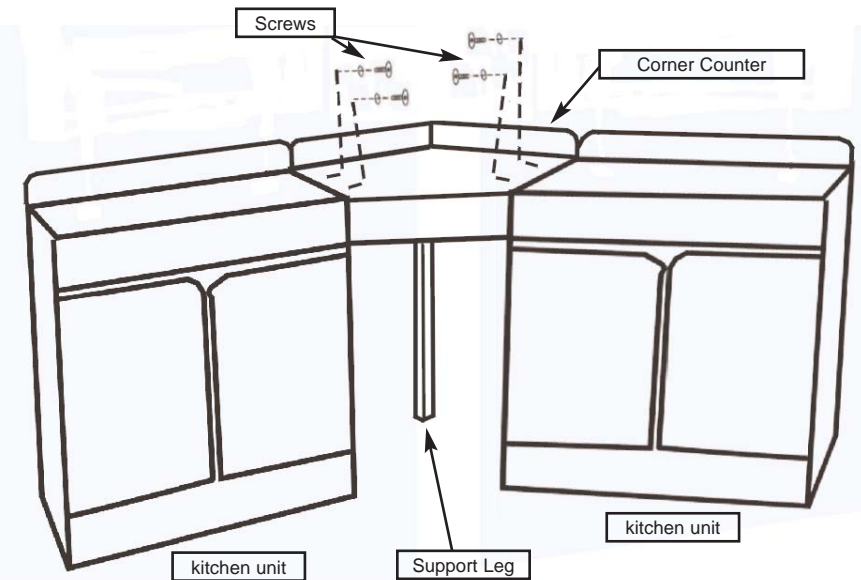

Instructions: Unbox unit and find hardware bag inside of box.

1 - To attach the corner counter we suggest that you have two people to do this. One to hold the counter in place while the other to put on the screws.

2a - **Corner Counter** - Place the two units you wish to connect on the floor approximately the width of the counter part. Take the corner counter and turn it over. Screw on the leg support onto the mounting plate on the bottom. Turn the corner counter right side up and have someone hold the counter up against one of the kitchen units making sure the counter is flush with the top and back edges of the kitchen unit top. Next slide the other kitchen unit up against the counter and screw on the other side.

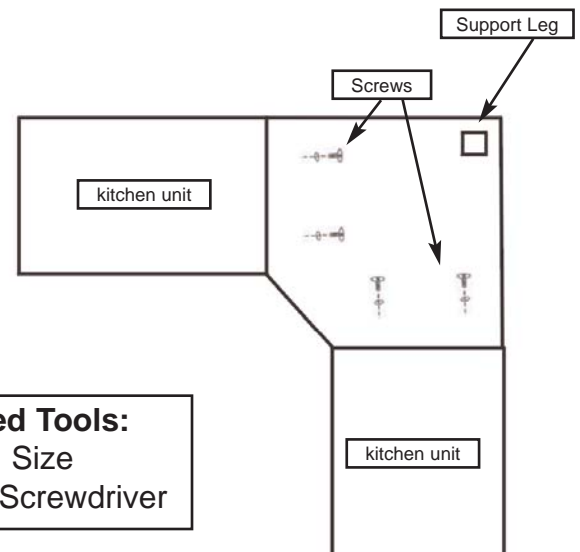

You should take care in moving the assembled kitchen units and counter.

Helpful hint: If you place two sided carpet tape in the sides of the counter and then press the counter onto the kitchen unit it will help hold it in place while you put on the screws.

Support leg screws on to corner counter with the hardware that is attached already.

Make sure that the counter is flush with the tops and back splash of the kitchen units. As shown.

Required Tools:
Medium Size
Phillips Screwdriver
