

Assembly Instructions for: Kitchen Units - Straight Counters

 **Warning: Choking Hazard**
Assembly hardware contains small parts. **Adult assembly required.**

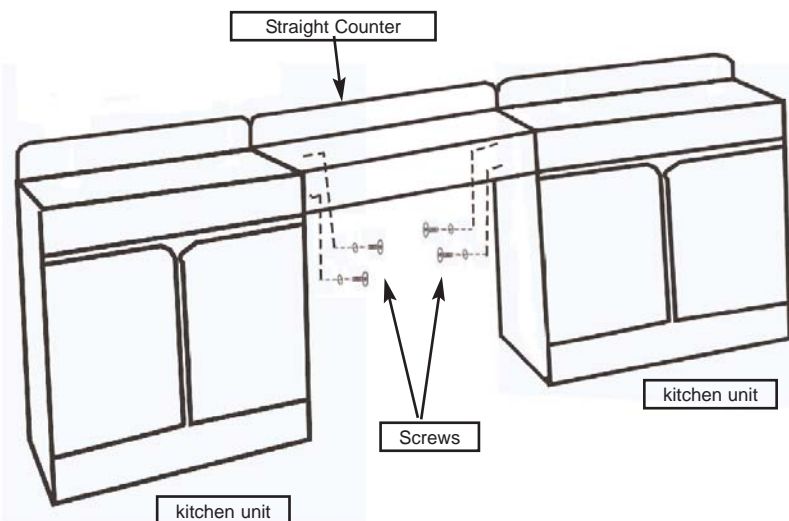

Instructions: Unbox unit and find hardware bag inside of box.

1 - To attach the straight counter we suggest that you have two people to do this. One to hold the counter in place while the other puts on the screws.

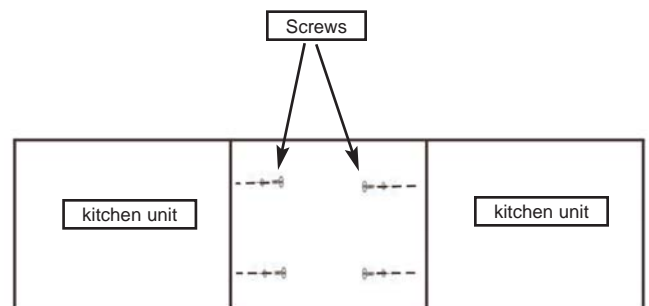

1a - **Straight Counter** - Place the two units you wish to connect on the floor approximately the width of the counter. Now have someone hold the counter up against one of the kitchen units making sure the counter is flush with the top and back edges of the kitchen unit top. Screw on this side of the counter. Do not let go of the counter. Next slide the other kitchen unit up against the counter and screw on the other side. You should take care in moving the assembled kitchen units and counter.

Helpful hint: If you place two sided carpet tape in the sides of the counter and then press the counter onto the kitchen unit it will help hold it in place while you put on the screws.

Required Tools:
Medium Size
Phillips Screwdriver

Make sure that the counter is flush with the tops and back splash of the kitchen units. As shown.
